MADE LOCALLY!
michigan rain barrels

Large Opening
Entire top covered with screen for use with or without a downspout or rain chain.

Select an Opening Option
(Oak Barrels Only)

Basic Opening
For use with downspout.

Rain Barrel Accessories

Flex Elbow

Flex elbows are for installation under a gutter downspout—the flex elbow diverts the water into the top of the barrel. Available in white or brown. **\$5.00**

Connector Hoses

Connector Hoses are used to connect two or more barrels which allow the overflow to go to the next barrel. You do not need a connector with only one barrel. **\$5.00 - \$7.50**

Diverter Kit (Wood Barrel Only)

Diverter kits can be installed on the oak rain barrels to allow overflow to go back into your downspout system rather than spill out of the top of the barrel. **You must specify that your barrel will be using a diverter kit so the top is manufactured to fit.** Installation is required. **\$30.00**

Rain Chains

Rain Chains can be used with the plastic or oak rain barrel. The chain is hung from an eave, tree or other structure and suspended into the top opening of the barrel. When it rains, the water follows the contour of the chain into the barrel. The chains can be very plain or very elaborate. These provide a water sound feature to the barrel location.

Hammered Cup with Ring Rain Chain

Double Loop Rain Chain

Copper Blossoms Rain Chain
